Message from President & organizing Chairman

Dear friends,

Accept greetings from the team of CIPM for the 5th time since 2006

We are proud to say that our team has worked very hard in last 6 years and left no stone unturned to make it one of the much awaited meeting in India and also in nearby continents. We have always tried to provide the latest in pain management along with the hands-on experience on cadavers over 4 days of meeting. It's so overwhelming to get positive feedback from delegates that we are stimulated to do much better every time. It's amazing that doctors who attended the meeting once have come 2-3 times again and again to brush up their skills and know newer things during this meeting. We are also lucky to have learned faculty during all these meetings along with many very energetic and knowledgeable delegates from different parts of globe. This combination worked in a great way for novices who could listen and see debates, discussions and learn finer tips about interventions in pain management.

There has been demand from our colleagues and all delegates to conduct some course which helps in clearing the very prestigious exam – FIPP conducted by World Institute Of Pain at different location across globe. Now for the first time we are happy to announce that FIPP preparatory course (endorsed by WIP) is in MUMBAI during this workshop. There will be special 4 days of parallel workshop for doctors from all across the globe who intend to take this exam and pass with flying colors. CIPM workshop has helped many such aspirant students to take the examination with confidence and pass effortlessly. We are sure the participating students will get an in-depth knowledge about the subject, get good time to spend on cadavers under supervision of our experts, get an experience of a FIPP like test conducted by our FIPP team of doctors, and also get tips of how to do it correctly in case of problems in conducting any interventions.

In short, CIPM and FIPP exam preparatory course will give delegates an ample time for cadaveric hands on experience , a great opportunity & chance to meet experienced and world renowned faculty from USA/UK/India, discuss your problems one to one.

We are sure you will grab this as an golden opportunity to learn new things, help improving your skills, make new
See you in MUMBAI

Dr. Jeetendra Jain
Scientific Chairman

Dr. Prakash Deshmukh
FIPP Course Incharge

Dr. Pravesh Kanthed
FIPP Workshop Incharge

Dr. Jose Rodriguez

Dr. Sanjay Bakshi
